

Secure Gun Safe

for protection of weapons and ammunition

Looking for a safe to store your guns and ammunition safely? Well, look no further because the Secure Gun Safe range will do the job.

The Secure Gun Safe is constructed from high specification materials and can be used to store guns, pistols and ammunition. With 5 or 8 guns capacity the range offers two models and both are equipped with a lockable compartment.

Models

The Secure Gun Safe is available in 2 models with single door. Both are equipped with a gun insert and lockable compartment as standard.

Construction

The single wall body is constructed from 3 mm solid steel plate. The 60 mm thick door has a double wall construction and is secured by a 3-way moving bolt work. All moving bolts are of 25 mm diameter and a fixed dogging bar secures the hinge side of the door.

Locking

All models are secured by a double bitted security key lock as standard. Optionally, a user friendly PIN-code lock or high security key lock (ECB•S / VdS Class A according to EN 1300) is available.

Additional features

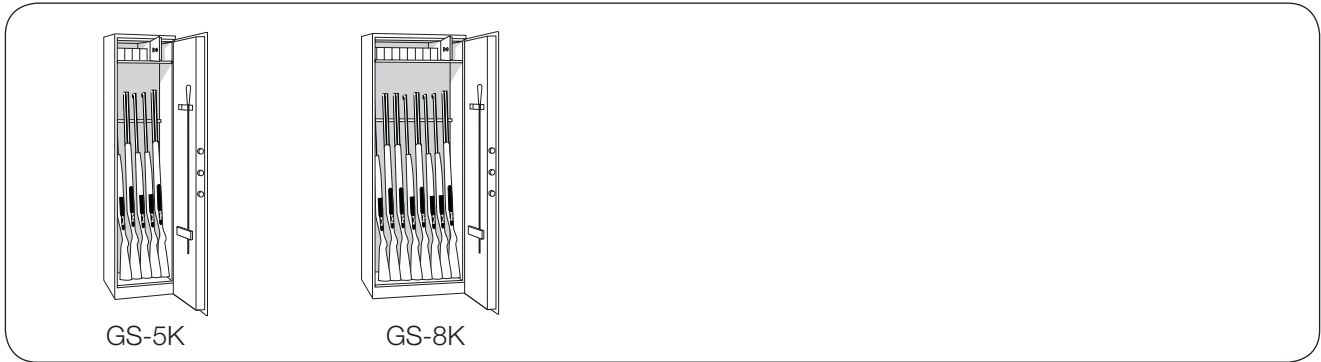

Each safe is equipped with a lockable compartment for the storage of ammunition. The compartment is secured by a cylinder key lock and supplied with 2 keys. At the inner side of the door provision is made for gun cleaning sticks. Furthermore, anchoring points in the base enable the safe to be secured to the floor.

Design

The Secure Gun Safe will complement any user environment and is supplied in two-tone colour finish of light grey and dark grey.
