

Epsilon Key Safes are designed to secure keys; be they car keys, office keys or site keys. It provides more protection than the typical light steel cabinets available from stationers.

Epsilon

BURGLARY-RESISTANT PROTECTION

Key Features

- Door is made of 6mm steel.
- Body is made of 2mm steel.
- 16mm diameter steel bolts operating in three directions secure the door.
- Epsilon cabinets have a key deposit feature on the side of the safe which allows keys to be securely deposited inside the safe. Once inside, an anti-fishing plate prevents their removal.
- Keys are stored on key hooks which, thanks to internal ladder racking, can be adjusted to accommodate keys of different lengths.
- Epsilon comes with a programmable electronic lock.
- A four point anchoring kit is supplied so the safe can be securely rear fixed to resist unauthorised removal once installed.
