

Gondola (Display) Shelving

Commonly used in retail stores for displaying merchandise.
Single sided runs for the wall, and double sided (island) runs for access to both sides.

Gondola shelving is ideal for the display of stock items in a retail environment.

We have a wide range of systems available to suit retail stores such as supermarkets, hardware stores, auto stores and newsagencies.

We can also supply a comprehensive range of accessories to suit virtually any type of product.

Wire baskets, pegboard hooks, angled shelves and wire mesh fronts and dividers to form bins....makes this style of shelving extremely versatile.
